

CLEANING MANUAL

CONCRETE AND POLISHED CONCRETE FLOORS

WATER ONLY + DIAMOND PAD – NO CHEMICALS REQUIRED

MACHINE WASHING, SCRUBBER AND A HIGH-SPEED MAINTENANCE

Concrete floor is a mineral layer. Daily cleaning and good surface quality depends on a proper maintenance system. The SupraShine diamond cleaning system is a fast and economic way of daily maintenance as well as concrete surfaces machine cleaning.

SupraShine diamond pads containing microdiamonds installed on a washing machine (hand or auto machine) will clean concrete or stone floor very quickly and effectively without the use of chemicals.

POLISHED CONCRETE

The following solutions are recommended on polished concrete:

- 1. Polished concrete daily maintenance**
 - polished concrete (high gloss) - SupraShine HP 3500
 - polished concrete (medium and low gloss) - SupraShine HP 1800
 - polished concrete (no gloss) - SupraShine HP 800 or HP1800
- 2. Polished concrete periodic maintenance** (once every 6-18 months)
 - dirty concrete floors deep cleaning - SupraShine HP 800 or HD400

UNPOLISHED INDUSTRIAL CONCRETE FLOOR

The following solutions are recommended on an unpolished concrete floor:

- 1. Post-construction cleaning**
 - smooth industrial concrete floor - SupraShine HD 400 or HP 800
- 2. Daily maintenance** (daily machine cleaning)
 - smooth industrial concrete floor - SupraShine HP 1800 or HP 3500
- 3. Old dirty concrete floor maintenance** - SupraShine HD 400 or HP 800
- 4. Getting rid of paintwork, coarse dirt, wheel marks** etc. - SupraShine HD 220 or HD 400

Extremely economic 100% ecological solution to clean any concrete, stone, terrazzo, resin, tile floor, etc.

Polished floors should not be cleaned with machines equipped with scrubbing brushes. Also, do not use aggressive chemicals or chemicals based on acids or alcohols.
